

Innovation and tradition since 1951

Our company was founded by Karl Küfner in 1951. Today we are an owner-managed family business with over 350 employees and three divisions:

- **Customised screens & filters**

Application-specific filters protect delicate or safety-relevant components against damage and wear.

www.kuefner-filter.com

- **High-quality weaving reeds**

Weaving reeds for production of industrial plastic and metal meshes with high standards of fineness and quality.

www.kuefner-weaving-reeds.com

- **Intelligent filter technology**

Measurement, analysis, control and documentation with MEMS technology - for all manufacturers in ventilation technology and ventilation analysis.
